## DEGREE REQUIREMENTS & CURRICULUM GUIDE [54 CREDITS]

### AREAS OF CONCENTRATION

The graduate program offers six areas of concentration. Each concentration is designed to give students a working knowledge of specific foci within the field of planning. To fulfill the concentration requirement, students select four courses related to the concentration in consultation with their advisor. The courses listed below provide suggestions for structuring a concentration. There may be additional one-time courses that can be used to construct a concentration.

Students with special interests may create their own concentration. In developing their programs, students may combine Hunter courses with the resources of the larger City University community or other approved institutions. Some individually tailored specializations may include Education Planning and Policy, Immigration and Global Change, Urban Information Systems.
